YOUR BEADS  
**SAVE NOW**

Learning is in the details

### Summer is coming soon!

It's about time to have a look at your prepared environment. Are all materials there? Are all materials still complete and consistent?

Maybe the colors of the beads in your prepared environment aren't that consistent anymore. This is your chance to change that. Make your bead material consistent in color again. Count your savings!

*From the minutes - an extract from a meeting between Maria Montessori and Nienhuis held on 15 October 1922*

#### Albert Nienhuis

Do you approve our bead colors?

#### Maria Montessori

With great interest I have followed your attempts to reach a harmonious color combination. The last version which you presented to me, is approved, if you use a lighter shade of pink for the bead bar of 3 to create a wider contrast with the red 1.
